Install Times Legend

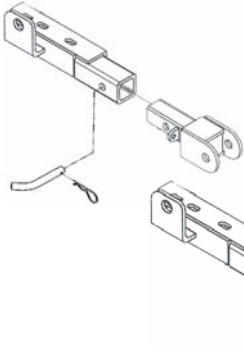

- A = 2.0 Hours
- B = 2.5 Hours
- C = 3.0 Hours
- D = 3.5 Hours
- E = 4.0 Hours
- F = 4.5 Hours

Bracket Type Legend

- XL** = Removable arms (pull pin to remove)
- EZ** = Removable arms (twist to remove) use receiver insert part number 210
- EZ2** = Removable arms (twist to remove) use receiver insert part number 212
- MX** = Removable arms (pull pin to remove, no crossbar needed)
- MS** = Non Removable arms (no crossbar needed)

Other Codes Legend

- N** = New Bracket
- C** = Change in bracket
- SO** = Special Order
- MT** = Allow 3-4 weeks manufacturing time

MX Bracket Ears Tow bar rating must exceed actual weight of towed vehicle fully loaded.

MX and MS brackets are only for use with motorhome mounted tow bars. They eliminate the need for the included QD crossbar. The MX and MS brackets will not work with a car mounted tow bar like the STOWMASTER, nor will they work with the Easy Hook Safety Cables, Guardian or any accessory that requires a Roadmaster QD crossbar.

MS Bracket Ears

1. Trimming of spoiler, air dam, grille or plastic fascia may be required on some models of this vehicle.
2. *****Note Deleted*****
3. Trimming the lower air dam, air deflector, cowling and/or rock guard is required on this model.
4. **84-89 Acura Integras** utilize 2 different brackets. The distinction is usually between 2dr & 4 dr. However, very rarely, the frames have been interchanged, requiring the opposite bracket design. To verify which bracket is necessary, look at the bolts that hold the E-A unit (Energy Absorption Unit) to the frame tower on the driver's side. If the E-A unit is bolted on with 3 bolts @ 1, 7 & 9 o'clock positions, then the 1510-3 designed for the 2dr is necessary. If it is bolted on with 2 bolts @ the 3 o'clock & 9 o'clock positions, then the 1510-1 designed for the 4dr is to be used. If it is bolted with 2 bolts, one @ 1 o'clock & one @ 7 o'clock, neither bracket will work.
5. **84-90 Caravans & Voyagers** utilized 2 different bumpers. The "metal bumper" has a steel or aluminum bumper that is visible. It may have plastic trim or plastic end caps, but a good portion of the metal bumper is visible. The "plastic bumper" has a plastic skin or fascia that completely covers the steel bumper core. No metal is visible.
6. **85-88 Sprints** utilized 2 types of sway bar mounting brackets. If the brackets are perpendicular to the sway bar, then the 110-1 is needed. If the brackets are at an angle to the sway bar, then the 109-1 is necessary.
7. **A) Most Renegades & Wranglers** utilize a steel bumper that is shaped like a "U". The steel bumper has a flat top & face, which the 1409-3 or 1409-1 brackets bolt to. However, some versions incorporate bumpers without a flat face & top which prevent the use of these brackets. **B) '98 Jeep Wrangler** uses 1417-1, if the front bumper has bumperettes.
8. **From 80-84, Subaru** utilized 2 types of E-A units (Energy Absorption Units). E-A units are the steel struts that join the bumper to the frame of the vehicle. These units are designed to collapse on impact & absorb the energy from collision. They are bolted to the front of each frame rail & to the back of the bumper. 1 type utilized by Subaru was round, which uses the 905-1 bracket kit #. If your vehicle has the standard square-tube E-A unit, use the 902-1 mounting bracket kit #.
9. Due to the different front-end trim packages used on these Ford & Mercury cars, it may be necessary to take a measurement in order to obtain the proper bracket kit #. The measurement is taken from the front bottom face of the frame, where it ends just behind the bumper (below the radiator). If the measurement is: 9 1/2" or less – use the 421-1 bracket
 11 1/2" or less – use 417-2 bracket
 13 1/2" or less – use the 415-1 bracket
Use the 417-3 bracket if there is no painted plastic under the bumper.
10. ***** Note Deleted *****
11. Measure outside across the front of the sub-frame horns under the isolation damper. 47 1/2" = 158-1 for Buick or 158-2 for Cadillac & Oldsmobile 49 1/2" = 158-4
12. 2 different tie down placements can be found on the 84-85 Honda Accords & 88-90 Acura Legends. A measurement must be taken from the center of the first bolt going up into the sub-frame directly behind the tie down plate to the center of the eye on the tie down plate. If the measurement is approx. 3 1/2", use the 1503-1 bracket. If this measurement is approx. 4 3/4", use the 1505-1 bracket.
13. If the vehicle has tack-welded tie down plates, the plates will be to be removed before mounting the brackets. This will add to the installation time.
14. Add 1.5 hours if vehicle has tow hooks. Hooks & brackets must be removed in order for brackets to fit.
15. **118-1 96 Suzuki Sidekick** – Check crossover tube. If ends are open, use the 118-1. If the ends are blocked, use the 118-8.
16. **118-3 96 Suzuki Sidekick** – Check crossover tube. If ends are open, use the 118-3. If the ends are blocked, use the 118-15.
17. If vehicle has bumper extensions (guards), use 139-3.
18. To determine which bracket you may need, locate 4 bolts on the bottom of the sub-frame just behind the lower radiator support. Are all of these bolts in a straight line from passenger's side to driver's side? If so, use kit # 104-1 or 148-1 depending on application. Some vehicles will have the passenger side outside sub-frame mounting bolt staggered forward 1/2". This will require bracket kit # 104-3 or 148-3 depending on application. This vehicle utilized several different sub-frames. It is possible that neither bracket will fit. If so, measure how far the lower radiator support extends below the sub-frame. Now, measure from the center of either 1 of the inside sub-frame bolts straight out to the middle of the underside of the bumper. Secondly, measure from the same sub-frame bolt straight out to the front edge of the bumper. Please have this information available when you call to place your order.
19. **On 95-96 Eagle Summits**, inspect the bumper. If white or dark gray, use 803-1. If silver, there is no bracket available.
20. Inspect tie down plates on the front of the frame. If attached with 3 bolts, use the 503-1. If welded, use the 503-2. Also measure from the center of the lower front bolt to the lip of the air dam. If 4 1/2" (approx.) use 503-1. If 6 1/2" (approx.) use the 503-3.
21. **The only RAV-4 that is towable** is the 2-wheel drive 5-speed. No REMCO available for automatics or 4-wheel drives.
22. Application for 131 series kit #. 2 different frame mounting locations may be found on 87 & newer GMC Trucks & SUV's. To determine which 131 series kit # to use, measure the distance between the centerline of the slotted hole (A) (See image 1 @ end of footnotes) on the bottom of the frame & the centerline of the lowest side mounting hole (B). **Note:** slotted hole can run vertical or horizontal. If the measurement is approx. 3", use kit #s 131-1, 131-15 (XL bracket) or 131-8 (XL bracket). If the measurement is approx. 1 1/4", use kit #s 131-2, 131-3 or 131-17 (XL bracket). Also refer to Note #1.
23. Inspect tie down loops. If welded & horizontal to the ground, use kit # 1501-1. If bolted & vertical to the ground, use kit # 1520-2.

24. Bracket will not fit if the vehicle has an after-market air conditioner.
25. **On the 91-96 Jeep Cherokees**, the plastic under the bumper must be trimmed & a small bumper strap needs to be cut.
26. 1418-3 may be substituted for the 1402-1; however, footnote 25 then applies. All 1418-1 & 1418-3 made before 9/18/97 WILL NOT FIT Cherokees with tow hooks.
27. A measurement must be taken to determine the correct bracket for the 74-93 Volvos. Locate the tow ring on the passenger side that is attached by 3 bolts to the frame. Measure from the center of the bumper to the center of the closest bolt hole that secures the tow ring. If 9" use 1701-1. If 8" use 1701-3. (As a secondary, check measure from the bottom of the frame on the bottom of the bumper. If 2" use 1701-1. If 1" use 1701-3).
28. Use the 445-16 instead of the 445-15 if your Windstar has the rear passenger air conditioning system.
29. **The 97 & newer Chrysler Cirrus, Dodge Stratus & 1998 Plymouth Breeze** utilizes 2 different motor sub-frame mounts. 1 sub-frame has a substantial 1 1/2" x 2" rectangular bent tube going underneath the engine near the motor mounts. Stratus & Breeze with this sub-frame require kit # #247-3. Stratus & Breeze with no cross member under the engine (near the motor mount) require 247-8.
30. Some vehicles will require Quick-Disconnect brackets for the additional space needed for TRACKER tow bar to fit properly.
31. Trimming of horizontal rib in lower grille is necessary on 98 & newer Plymouth Voyagers.
32. Check the bottom front frame rails adjacent to the tie down plates for factory holes or frame nuts. If present, use 317-2 bracket kit. If NO holes are present, use a 329-1 bracket kit.
33. No REMCO available for automatics.
34. Jeeps with factory fog lights will have to move fog lights 1" out from the stock position to clear mounting hardware.
35. Customers should check & make sure that front tie down loops are present before ordering kit.
36. Although the same basic frame was used on all Chevy & GMC pickups & SUV's from 1987-2000, slight frame variations require different brackets to accommodate all of these vehicles. Carefully read the following to determine the correct bracket:
For 87-98 Chevy & GMC trucks & SUV's: measure the distance from point A (on the bottom of the frame) to point B (on the side of the frame). The hole on the bottom of the frame is slotted & may run from front to back or from side to side. See **CHART 1** to determine the correct bracket. (See **IMAGE 1** at end of footnotes).
For 99 & newer Chevy & GMC trucks & SUV's: If the tow hooks are bolted externally to the bottom of the frame, use the instructions above for the 87-98 Chevy & GMC trucks & SUV's. If the tow hooks are bolted internally in the frame rail, use **CHART 2** to determine the correct bracket.
FOR 1/2 TON 2 WHEEL DRIVE ONLY: Check front suspension for torsion bar or coil spring. If you have torsion bar, use kit 199-1 XL or 199-3 MX. If you have a coil spring, use 199-8 XL or 199-9 MX. **FOR 3/4 TON 2 WHEEL DRIVE** with torsion bar, use 3101-1.
37. This bracket will accommodate any ROADMASTER motorhome mounted tow bar. This bracket is designed for heavier vehicles. Make sure the tow bar you use exceed the weight of the vehicle to be towed when full loaded. Anchor brackets for Sterling cables WILL NOT FIT MX or MS style brackets. To use MX or MS bracket with Sterling tow bar, the Sterling cable anchors must be attached to the frame of the vehicle or welded to the receiver portion of the bracket.
38. This frame utilizes 2 types of tie downs. If the tie down is bolted in, use kit # 606-1. If the tie down is welded in, use kit #607-4.
39. Bulb wiring kit (part 155) is needed.
40. **ON 2002 MODELS ONLY:** need to check for sub-frame mounting bolts. These bolts are located under a splash panel behind the bumper. These bolts hold the engine cradle to the main frame. If these bolts are present, use a 194 series bracket.
41. **ON 2004 MODELS ONLY:** bracket will not fit short wheelbase of 113.3
42. Trimming of outside grille opening required for receiver to fit on 04 & 05 models only.
43. Tow Package Auxiliary fans must be removed.
44. No right hand drive/steering.
45. This bracket will not fit with the bumper fascias on the AJ or AK Body Styles.
46. Bracket will not fit if vehicle is equipped with the Dynamic Laser Control.
47. On 2006 Acura MDX Models only: Must check tow ability with manufacturer.
48. This vehicle will not work with the Stowmaster All Terrain.
49. Special tools required – see instructions.
50. Please review the supplemental page located in the back of instructions if the vehicle is equipped with the auxiliary pump.
51. Will not work with optional Mopar skid plate.
52. Please view instruction 3151-1 regarding the trimming of the front fascia for the Redline model.
53. Check towability with manufacturer.
54. Standard fascia for four door sedan sport model G35. Please view our pictures posted for this bracket.

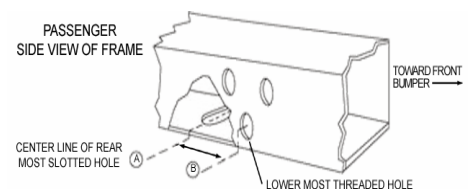

CHART 1 (see Chart 3) If Measurement is:	5000 LB Bracket	5000 LB XL Bracket	8000 LB MX
Approximately 1 1/4"	131-2*	131-17*	131-3*
Approximately 3"	131-1*	131-15*	131-8*
