

9700 ROADMASTER

PORTABLE BRAKING SYSTEM

The 9700 is a portable supplemental braking system that applies a pre-set pressure to the towed vehicle's brake pedal – simply push a button to select light, medium or heavy braking. Or, just as easily, the 9700 may be set to activate only in an emergency break away.

The 9700 uses the electrical connections already in place on your towed vehicle (the towed vehicle's electrical harness) to brake when you brake the motorhome – the same electrical signal that activates the towed vehicle's brake lights also activates the 9700.

Emergency break away system is included.

This system is designed to bring your vehicle to a controlled stop should it ever separate from your motorhome.

Includes a motorhome mounted LED for a visual reference of braking activity

- 9700 Features -

- Three braking pressure presets: **Light**, **Medium** or **Heavy**
 - Or, the 9700 may be set to activate only in a break away.
- Activates only with the electrical signal that activates the towed vehicle's brake lights – no false braking!
- Connects and disconnects from the towed vehicle in just a minute or two.
- Includes an LED motorhome monitor for a visual reference of braking activity.
- Includes an emergency break away system
 - The 9700 automatically delivers maximum braking pressure in a break away.
- Automatically protects the towed vehicle's brakes –
 - The 9700 releases braking pressure after an extended period of braking, then activates the next time the motorhome's brakes are applied.
 - Audible alert at motorhome indicates extended braking.
- Continuous positioning protection –
 - Audible alert at motorhome when unit is incorrectly positioned
- Easily transfers from one towed vehicle to another, without expensive labor fees. (Initial installation is typically under an hour, depending on the vehicles.)
- Recovers quicker – the 9700 is ready for the next stop nearly twice as fast as other systems with smaller air compressors.
- Adjustable brake pedal clamp – fits brake pedals that other systems can't.
- Does not accumulate water in the reservoir tank, unlike other systems – no puddles on the carpet!
- Four independently adjustable feet – for a stable platform in vehicles with uneven floors.
- Meets U.S. and Canadian braking requirements.

Adjustable pedal clamp secures the 9700 to the towed vehicle's brake pedal.

Adjustable handle for a custom fit against the driver's seat.

Large capacity air compressor recovers quicker - ready for the next stop nearly twice as fast as other systems.

Adjustable feet for vehicles with uneven floorboards.

Easy as **1•2•3**
to hook up!

Step 1.

Position the 9700 between the driver's seat and brake pedal. Attach the pedal clamp.

Step 2.

Move the driver's seat up to the 9700.

Step 3.

Plug in the wiring harness, the power cord, and press the "Test" button.
Ready...Set...Tow!

9700 ROADMASTER
PORTABLE BRAKING SYSTEM

Efficient, effective...and easy!
Push-button control – the 9700 is a preset system with three braking preferences: light, **medium** or **heavy braking**

Or, the 9700 may be set to activate **only** in an emergency break away.
