

# BASEPLATE KIT INSTALLATION INSTRUCTIONS

ROADMASTER, Inc. 6110 NE 127th Ave. Vancouver, WA 98682 1-800-669-9690 fax 360-735-9300 www.roadmasterinc.com

**PARTS LIST:**

- 1- FRONT BRACE (A) - Passenger side
- 1- FRONT BRACE (B) - Driver's side
- 1- LOWER RECEIVER (C) - Passenger side
- 1- LOWER RECEIVER (D) - Driver's side
- 1- CROSS BRACE (E)

**KIT NO. 445-16**

7/28/04

**IMPORTANT:** All baseplates *must* be assembled with all the bolts left loose for final adjustment and positioning (before tightening) unless otherwise instructed. All bolts *must* be torqued for proper strength. If more than one bolt is used per fastening point, the diagram may only show one.

- Use flat washers over all slotted holes
- Use lock washers on all fasteners

## **WARNING**

Failure to follow the below warnings and the installation instructions may result in voiding your warranty, property damage, the loss of your towed vehicle, personal injury or even death.

- Installation of most baseplates requires moderate mechanical aptitude and skills. We strongly recommend professional installation by an experienced installer.
- The installer must read the instructions and use all bolts and parts supplied.
- Use Loctite® Red on all bolts used for mounting this baseplate.
- Every 3,000 miles, the owner must inspect the fasteners for proper torque, according to the bolt torque requirements chart on the last page of these instructions. The owner must also inspect all mounting points for cracks or other signs of fatigue every 3,000 miles.
- The owner must check the vehicle manufacturer's instructions for the proper procedure(s) to prepare the vehicle for towing. Some vehicles must be equipped with a transmission lube pump, an axle disconnect, driveline disconnect or free-wheeling hubs before they can be towed. Failure to properly equip the vehicle will cause severe damage to the transmission.
- Do not weld. This baseplate is designed to be bolted to the vehicle. Welding will void the warranty.
- Do not use this document for custom fabrication, as it may not show all parts or structural components could result in loss of the towed vehicle.
- If the towed vehicle has been in an accident, it must be properly repaired before attaching the baseplate. Do not install the baseplate if any structural frame damage is found.
- If running changes were made by the vehicle manufacturer after this

kit was designed, some bolts or other fasteners in the hardware pack may no longer be the correct size. It is the installer's responsibility to verify this kit is securely fastened to the vehicle and fitted with the correct hardware to account for these changes.

- Roadmaster manufactures many styles of baseplates. If your baseplate has removable arms, they must be removed before driving the vehicle, unless the arms can be pinned or padlocked in place. If not secured, the arms could vibrate out.
- Some motorhome chassis have such a tight turning radius that you can damage your motorhome, towed vehicle, tow bar or baseplate while turning sharply. Before getting on the road, test your turning radius in an empty parking lot. Turning too sharply could result in non-warranty damage to towing system, motorhome and/or towed vehicle.
- Do not back up with the towed vehicle attached or non-warranty damage will occur to your towing system, motorhome and/or towed vehicle.
- The safety cables must connect the towing vehicle to the towed vehicle frame to frame, with the cables crossed, with enough slack for sharp turns. Refer to the cable instructions for proper routing. Failure to leave enough slack in the safety cables, or failure to connect the safety cables frame to frame, will result in the loss of the towed vehicle.
- This kit is designed for use with ROADMASTER tow bars and ROADMASTER adapters only. Using this kit with other brands, without an approved ROADMASTER adapter, may result in non-warranty damage or injury.
- Upon final installation, the installer must inspect the baseplate to ensure adequate clearance, particularly around hoses, air conditioner lines, radiators, etc.
- This baseplate is only warranted for the original installation. Installing a used baseplate on another vehicle is not recommended and will void the warranty.

# BASEPLATE KIT INSTALLATION INSTRUCTIONS

ROADMASTER, Inc. 6110 NE 127th Ave. Vancouver, WA 98682 1-800-669-9690 fax 360-735-9300 www.roadmasterinc.com

**KIT NO. 445-16**

- Important:** please use all supplied bolts and parts and read all instructions carefully before beginning this installation. The majority of questions you may have can be answered within the text, and proper installation will ensure safe and secure travel. Now, begin the installation. This is one of our *XL Series* bracket kits which allows the removal of the front braces when not in use. The receiver braces mount to the front suspension sub frame, utilizing three existing holes per side in the sub frame. Two of these holes are located in the bottom of the sub frame and the third is located on top of the sub frame directly behind the sub frame isolation mount.
- Fit the receiver braces to the sub frame then bolt using the supplied 1/2" x 1 1/2" carriage bolts, 1/4" x 2" x 2" square hole backing plates, flat washers, lock washers and nuts. Be sure the braces are mounted as illustrated.
- Bolt the cross brace to the front of the receiver braces using two 1/2" x 1 1/2" bolts, flat washers, lock washers and nuts on each side.
- Insert the front braces into the receiver braces and pin using 5/8" draw pins and 1/8" spring pins. Mount the tow bar according to the manufacturer's instructions then align and tighten all bolts to the torque specifications below.
- Use the braces as templates for drilling the remaining hole in the side of each sub frame arm. Finish bolting the brace using the hardware specified in step 2 and tighten to the torque specifications below.
- Install the 15" safety cables on the receiver braces using the supplied cable connectors. Connect the other ends to the tow vehicle.

**Hardware:**

- 8- 1/2" x 1-1/2" carriage bolts
- 12- 1/2" lock washers
- 12- 1/2" nuts
- 6- 1/4" x 2" x 2" square hole backing plates
- 16- 1/2" flat washers
- 4- 1/2" X 1-1/2" bolts
- 2- 5/8" draw pins
- 2- 1/8" spring pins
- 2- cable connectors
- 2- 15" cables
