## Instructions

**1.** Before installing the seat adaptor, the mounting post (that was included with your BrakeMaster system) must be removed from the round plate (Fig.1). First, secure the round plate in a vise. Use a wrench to loosen the mounting post, while holding the bolt with an Allen wrench. Don't try to turn the Allen bolt with the Allen wrench, as you might damage the wrench or bolt. Use a 1/2" open-end wrench to twist the mounting post off. Then, secure the mounting post to the center of the seat adaptor, using the included 3/8" x 3/4" bolt and 3/8" lock washer.

**2.** Remove the two 13mm (head) seat track mounting bolts. Now, place the seat adaptor over the holes you removed the 13mm (head) bolts from and bolt into place using the 10mm x 1.5 x 35mm bolts, lock washers and flat washers.
