Parts List

- (1) 3/8" lock washer
- (1) 3/8" x 3/4" bolt

Instructions

1. Before installing the seat adaptor, the mounting post (that was included with your BrakeMaster system) must be removed from the round plate (Fig.1). First, secure the round plate in a vise. Use a wrench to loosen the mounting post, while holding the bolt with an Allen wrench. Don't try to turn the Allen bolt with the Allen wrench, as you might damage the wrench or bolt. Use a 1/2" open-end wrench to twist the mounting post off. Then, secure the mounting post to the center of the seat adaptor, using the included 3/8" x 3/4" bolt and 3/8" lock washer.
2. Remove the seat track mounting bolts. Lift the seat up slightly and slide the seat adaptor between the floor and the seat bracket. Line up the holes in the adaptor with the holes in the floor and seat bracket. Bolt into place using the factory seat track mounting bolts.

WARNING

Failure to follow these instructions can result in property damage, personal injury or even death.
