- ## Parts List
- (1) 3/8" lock washer
  - (1) 3/8" x 3/4" bolt

## Instructions

1. Before installing the seat adaptor, the mounting post (that was included with your Brake Master system) must be removed from the round plate (Fig.1). First, secure the round plate in a vise. Use a wrench to loosen the mounting post, while holding the bolt with an Allen wrench. Don't try to turn the Allen bolt with the Allen wrench, as you might damage the wrench or bolt. Use a 1/2" open-end wrench to twist the mounting post off. Then, secure the mounting post to the center of the seat adaptor, using the included 3/8" x 3/4" bolt and 3/8" lock washer.
2. Remove the two front 15mm (head) seat track bolts. Now, place the adaptor between the floor and the seat tracks, bolt into place using the 15mm (head) factory bolts.
