post on seat adapter must be in line with the brake pedal

Before Installation

Installation Complete

## Instructions

1. Locate the mounting post that came with your BrakeMaster. If needed, order part number 450596. Now, secure the post to the center of the seat adapter using the included 3/8" x 3/4" bolt and 3/8" lock washer. If the hole is countersunk, use the Allen head bolt and lock washer included with this kit. Then, remove the two 14mm (head) seat track bolts (Fig.1).
2. Place the seat adapter under the seat tracks and bolt it into place using the supplied 10mm x 1.25 x 40mm bolts and lock washers. Torque to 40 ft./lbs. *Note:* the mounting post on the adapter must be directly in line to the brake pedal (Fig.2). The BrakeMaster air cylinder may jam or function incorrectly if the mounting post is not directly in line with the brake pedal.
3. Attach the air cylinder to the adapter.

### Parts List

- (2) 10mm x 1.25 x 40mm bolts
- (2) 10mm lock washers

**WARNING**

Failure to follow these instructions can result in property damage, personal injury or even death.
