Instructions

1. Locate the mounting post (Fig.1) that came with your BrakeMaster. If needed, order part number 450596. Now, secure the post to the center of the seat adapter using the included 3/8" x 3/4" bolt and 3/8" lock washer. If the hole is countersunk, use the Allen head bolt and lock washer included with this kit.
2. Remove the two front 8mm (head) seat track bolts.
3. Slide the seat forward as far as it will go, and loosen the rear seat track bolts (Fig.2).
4. Place the seat adapter between the floor and the front seat tracks (Fig.3). *Note:* the mounting post on the adapter (Fig.1) must be directly in line to the brake pedal. The BrakeMaster air cylinder may jam or function incorrectly if the mounting post is not directly in line with the brake pedal.
Now, on each side, bolt through the seat adapter and into the floor using the included 8mm x 1.25 x 35mm bolts, 8mm lock washers and 8mm fender washers. Tighten the rear seat track bolts.
5. Attach the air cylinder.
