Instructions

1. Locate the mounting post (Fig.1) that came with your BrakeMaster. If needed, order part number 450596. Now, secure the post to the center of the seat adapter using the included 3/8" x 3/4" bolt and 3/8" lock washer. If the hole is countersunk, use the Allen head bolt and lock washer included with this kit.
2. Remove the two front seat track covers (Fig.2) and the two front 13mm (head) seat track bolts (Fig.3). Then, slide the seat all the way forward to gain access to the rear seat track bolts. Next, loosen both of the rear seat track bolts to allow the front of the seat to be lifted slightly and the seat adapter to be placed between the floor and the seat tracks. Once in position, bolt into place using the supplied 10mm x 1.5 x 30mm bolts, lock washers and fender washers (Fig.4).
3. Attach the air cylinder to the adapter.
