Instructions

1. Locate the mounting post (Fig.1) that came with your BrakeMaster. If needed, order part number 450596. Now, secure the post to the center of the seat adapter using the included 3/8" x 3/4" bolt and 3/8" lock washer. If the hole is countersunk, use the Allen head bolt and lock washer included with this kit.

2. Push the front seat all the way forward, remove the rear seat track covers and loosen the rear seat track bolts. Push the seat back to gain access to the front seat tracks.

3. Now, remove the two seat track covers and the two 14mm (head) front seat track bolts (Fig.2).

4. Place the seat adapter between the seat tracks and the floor and over the holes you exposed in step 2. Bolt it into place using the two supplied 10mm x 1.25 x 35mm bolts, 10mm lock washers and 3/8" flat washers (Fig.3). Re-tighten the rear seat track bolts.

Note: position the adapter so that the mounting post (Fig.1) is directly in line to the brake pedal. The BrakeMaster air cylinder may jam or function incorrectly if the mounting post is not directly in line with the brake pedal.
