

# SEAT ADAPTER KIT #88361 INSTALLATION INSTRUCTIONS

6149-00

ALL SPECIFICATIONS ARE SUBJECT TO CHANGE WITHOUT NOTICE

ROADMASTER, Inc. 6110 NE 127th Ave. Vancouver, WA 98682 360-896-0407 fax 360-735-9300 www.roadmasterinc.com

## Instructions

1. Locate the mounting post (Fig.1) that came with your BrakeMaster. If needed, order part number 450596. Now, secure the post to the seat adapter using the provided hole and the included 3/8" x 3/4" bolt and 3/8" lock washer. If the hole is countersunk, use the Allen head bolt and lock washer included with this kit.
2. Move the seat back as far as it will go. Remove two T50 bolts attaching the seat tracks to the floor pan (Fig.2).
3. Tip the seat back slightly and place the seat adapter under the seat track ends, ensuring that the cutouts align with the protrusions under the seat track (Fig.3). Replace the bolts you removed in step 2. After tightening, there should NOT be space between the seat adapter and seat track. Adjust as necessary to ensure there isn't space.
4. Attach the air cylinder to the adapter. *Note:* the mounting post on the adapter (Fig.1) must be directly in line to the brake pedal. The BrakeMaster air cylinder may jam or function incorrectly if the mounting post is not directly in line with the brake pedal.

### IMPORTANT

Once the seat adapter has been installed, carefully run the seat through its full range of motion. If it is impeded in any way, immediately stop and correct the interference. Failure to do so may result in non-warranty property damage.

**WARNING**

Failure to follow these instructions can result in property damage, personal injury or even death.
