

# INVISI BRAKE®

towed car braking system

## Nothing. Zip. Zero. Zilch. Nada.

Nothing to take in and out of your towed vehicle and nothing to push, pull, set, adjust, activate or deactivate.

What could be easier than nothing at all?

- **Out of sight**

InvisiBrake is so small it can usually be mounted under a seat.

- **'Set-it-and-forget-it' braking**

When you apply braking force, so does InvisiBrake— up to the preset level.

- **Charges your battery while towing**

InvisiBrake constantly charges the battery during towing — InvisiBrake will never drain the battery.

- **Two-stage motorhome monitor**

LED monitor for a visual reference and an audible alarm to warn of extended braking.

- **It fits and it's required**

InvisiBrake works in virtually any towed vehicle including hybrids and meets U.S. and Canadian braking requirements.

# INVISIBRAKE

towed car braking system

## How does InvisiBrake work?

1. The controller receives a braking signal from the motorhome.
2. The vacuum created by the controller energizes the power brakes.
3. The air cylinder pulls a cable that activates the brakes.
