**Purpose of the adapters**
If the Tow Defender is too short to connect to the original shoulder bolt adapters, use the 4750-02 adapters. They will extend the reach of the Tow Defender by two inches.

**Using the adapters**
Replace the original shoulder bolt adapters with the 4750-02 adapters (see Figure 1), and follow the installation instructions that came with the Tow Defender.
(For a copy of the most recent installation instructions, visit roadmasterinc.com. The instructions are under “Support” > “Installation Instructions.”)
